PROFILE

Junior full-stack developer with a strong front-end foundation (React, Next.js, TypeScript) and back-end experience with Node.js, REST APIs and PostgreSQL. I took a bilingual website for a real client to production, from requirements gathering to domain, DNS and email. CompTIA Security+ and CySA+ certified, I care about automated testing, CI/CD and application security. A fast learner looking for a team to grow with on real projects.

PROJECTS

Vagabondando — travel-journal website for a trekking guide

Client project • vagabondando.site

Next.js 16, React 19, TypeScript strict, Tailwind CSS 4, Sanity (headless CMS), next-intl, Resend, Upstash Redis, Vercel BotID, Vercel, Vitest, GitHub Actions • v1: Stripe, PostgreSQL/Neon, Drizzle ORM, Clerk • WordPress, Elementor

- Bilingual (it/en) website live at vagabondando.site: content edited by the client herself in Sanity Studio without touching code, static pages regenerated every 60 seconds (ISR), continuous deployment on Vercel with a preview for every pull request.
- Contact form with layered abuse protection (Vercel BotID, honeypot, Upstash Redis sliding-window rate limit) and pure, dependency-injected logic covered by 28 tests; failures are never reported as success.
- International SEO (canonical, hreflang, Open Graph, localized sitemap) and responsive images served by Sanity's CDN through next/image; domain, DNS and transactional email with DKIM/SPF on Resend.
- Idempotent migration script from the WordPress site (SQLite + Gutenberg HTML → Portable Text) with I/O-free, tested core logic.
- Earlier e-commerce version: Stripe Checkout with deposit and balance payments, concurrency-safe overbooking prevention via SELECT ... FOR UPDATE on PostgreSQL, idempotent webhooks, scheduled balance emails, Clerk-protected admin; verified end-to-end in Stripe test mode. Turned into a showcase site in one day when the client dropped online payments.
- Also built a WordPress + Elementor version with a custom theme; gathered requirements directly with a non-technical client.
- AI-assisted development with Claude Code: written specs and plans, architecture docs updated in every PR, TDD on domain logic, GitHub Actions CI (type-check, lint, 102 tests, build).

Matchday — simulated sports-betting platform

Personal project • Demo: matchday-web-plum.vercel.app • Code: gitlab.com/Federico-Ordonselli/matchday

TypeScript, React, Vite, Angular, Node.js, Express, Zod, PostgreSQL, Drizzle ORM, Vitest, React Testing Library, Cypress, GitLab CI, Vercel

- Monorepo with a React frontend, an Angular back office and a Node/Express REST API.
- Operator back office with secure sessions (HttpOnly cookies, CSRF) and database-managed odds.
- Gitflow with merge requests; GitLab CI pipeline with tests, SAST and Secret Detection; v1.0.0 release.

Runebog — tabletop RPG campaign manager

Personal project • Demo: runebog.app

Next.js, React, TypeScript, PostgreSQL, Drizzle ORM, Auth.js/OAuth, SVG, PWA, GitHub Actions, Vercel

- Web app and PWA with OAuth login, cloud sync and a dependency-free SVG map editor.
- 104 automated tests covering input sanitization, XSS prevention and deterministic dungeon generation.
- WCAG contrast verified across 12 themes; optimistic concurrency control and REST API.

PROFESSIONAL EXPERIENCE

ICTS Italia — Airport Security Officer

2023 – 2025 • Rome Fiumicino Airport

- Monitored control systems in a high-risk, 24/7 operational environment.

- Handled critical situations under pressure following standard procedures, escalation paths and structured reporting.

TECHNICAL SKILLS

Front-end: TypeScript, JavaScript, React, Next.js (App Router, Server Components, Server Actions), Angular, HTML, CSS, Tailwind CSS, next-intl (i18n), WCAG accessibility, technical SEO

Back-end & data: Node.js, Express, Python, FastAPI, REST APIs, PostgreSQL, Drizzle ORM, SQLite, Redis, transactions and locking

CMS & e-commerce: WordPress, Elementor, PrestaShop, Sanity (headless CMS, GROQ, Portable Text), Stripe (Checkout, webhooks)

Services: Vercel, Neon, Upstash, Resend, Clerk, Auth.js, OAuth

DevOps: Git, Gitflow, GitHub Actions, GitLab CI/CD, Docker, Terraform, Azure, Linux, Bash, DNS (DKIM, SPF)

Quality & security: Vitest, React Testing Library, Cypress, Playwright, TDD, input validation, XSS prevention, CSRF, rate limiting, bot protection, SAST

AI tools: Claude Code (AI-assisted development with specs, review and CI)

CERTIFICATIONS

- CompTIA CySA+ (CS0-003) — January 2026
- CompTIA Security+ (SY0-701) — October 2025
- IBM Data Analyst Professional Certificate (Coursera) — August 2025
- Meta Front-End Developer Professional Certificate (Coursera) — in progress

EDUCATION

Italian scientific high-school diploma (Liceo Scientifico, Applied Sciences track, with computer science in the curriculum) — Liceo Scientifico A. Labriola, Rome

LANGUAGES

Italian: native • English: C1 • Driving licence (B)
